

Use low-dust bedding options and avoid straw

Do not store hay or straw in close proximity to horses

Keep windows and doors open to improve air flow

Do not sweep or use leaf blower when horses are in the stable

## EQUINE ASTHMA CAN TAKE THEIR BREATH AWAY

Managing dust, endotoxins and molds in the environment is an important step in controlling equine asthma and helping horses to breathe easier.

Discard moldy hay

Feed hay from the ground

Keep horses with asthma outside as much as possible\*

Feed soaked or steamed hay, hay pellets, or haylage for lower dust options

### DO

- Keep horses with asthma outside as much as possible\*
- Use low-dust bedding like wood shavings, cardboard or paper
- Keep windows and doors open to improve air flow
- Feed hay from the ground
- Feed soaked or steamed hay, hay pellets, or haylage for lower-dust options
- Discard moldy hay
- Move horses outside to clean the stable and sweep
- Find places to store hay so it is not in close proximity to stabled horses
- Keep stable as clean as possible

### DON'T

- Feed moldy or dusty hay
- Use high-dust bedding
- Store hay or straw in close proximity to horses
- Confine horses in poorly ventilated areas
- Keep affected horses indoors for long periods\*
- Keep the stable windows closed
- Clean stalls, sweep or use leaf blower when horses are in the stable

\*Except for horses with summer pasture-associated equine asthma, which will benefit from housing in dust-free and well-ventilated stables.

**IMPORTANT SAFETY INFORMATION:** ASERVO EQUIHALER is indicated for the management of clinical signs associated with severe equine asthma in horses. ASERVO EQUIHALER has not been evaluated in pregnant or lactating mares. In a large clinical field study, the most common adverse reactions reported were coughing, nasal discharge, sneezing, and nasal irritation/bleeding. Glucocorticoids should be used with caution in horses at a higher risk for laminitis. Not for use in humans. Keep this and all medications out of the reach of children. In case of accidental inhalation, seek medical advice immediately.
